

“Ico-remote”: your savings in a klik

Ico Power offers its customers
a remote monitoring service
which can track, in real time,
the efficiency results.

Benefits

Choosing ICO-REMOTE service the customers are able to access to a reserved area where:

- they can check **the status of operation** of the installed systems
- they can see in **real-time network parameters** and moreover
- they receive **“alerts”** via email
- they receive email with **the consumption data report**

Service purchase

The remote control is an **additional service** offered with two possible solutions:

- A **monthly** fee enclosed in rental contract
- An **annual** subscription
